SUMMARY

Computer Science Engineering student (Expected 2027) with hands-on technical proficiency in full-stack web architecture, machine learning pipelines, and relational database systems. Backed by intensive industry-aligned training in server-side logic, API development, and data workflows. Adept at leveraging modern languages and frameworks to engineer scalable, high-performance web applications and data-driven software solutions.

SKILLS

Languages & Core:	Python, JavaScript, TypeScript, SQL, HTML5, CSS3, Object-Oriented Programming
Frontend & Architecture:	React.js, Next.js, Responsive Web Design, Flexbox, CSS Grid, Bootstrap, Component-Based UI
Backend & APIs:	Node.js, Express.js, Django, RESTful API Design, Middleware Integration, Server-Side Routing
Databases:	MongoDB, PostgreSQL, MySQL, SQLite, NoSQL, Schema Optimization
Machine Learning / Data:	Scikit-learn, Pandas, NumPy, Exploratory Data Analysis (EDA), Feature Engineering, Matplotlib
DevOps & Tools:	Git, GitHub, VS Code, Postman, Vercel, Render, Unit Testing, Debugging, Agile Workflow

PROJECTS

Predictive Sales and Inventory Forecasting Model | Python, Scikit-learn, Pandas, NumPy, Matplotlib

- Engineered an end-to-end machine learning regression pipeline to analyze historical retail transaction data and forecast precise inventory demand trends.
- Executed robust exploratory data analysis (EDA), automated data cleaning, and feature engineering transformations using Pandas and NumPy to maximize predictive accuracy.
- Optimized and evaluated regression models (Linear Regression, Random Forest) via Scikit-learn, delivering visual performance analytics using Matplotlib.

Full-Stack Task Management & Collaboration Platform | Python, Django, SQLite, HTML5, CSS3

- Architected and deployed a production-grade full-stack task management ecosystem featuring dynamic server-side routing, user authentication, and secure CRUD operations via Django MVT design patterns.
- Integrated efficient database indexing and relational mapping using SQLite to ensure rapid data retrieval and reliable session management.
- Designed a responsive, mobile-first user interface utilizing Bootstrap and advanced CSS grid structures to deliver optimal cross-device accessibility.

E-Commerce Inventory & Stock Tracking API | JavaScript, Node.js, Express.js, MongoDB

- Developed a scalable backend microservice architecture designed to track multi-tier product SKUs, stock counts, and live inventory modifications for retail workflows.
- Designed modular, secure RESTful API endpoints using Express.js and Node.js to manage asynchronous database communication and handle high-volume JSON data payloads.
- Implemented automated stock threshold filtering and exception-handling middleware to safeguard data integrity and enhance administrative reporting metrics.

EDUCATION

Bachelor of Engineering in Computer Science Engineering (Expected 2027)

Nawab Shah Alam Khan College of Engineering and Technology, Osmania University – Hyderabad, India

Intermediate (Class XII) – MPC (Passed May 2023, A Grade) | Shaheen Junior College – Hyderabad, India (Score: 844 Marks)

Secondary School Certificate (Class X) (Passed May 2021) | St. Maaz High School – Kurmaguda, Hyderabad, India (CGPA: 9.2)

CERTIFICATIONS

Full Stack Development Training (HTML, CSS, JS, Python, Django, MySQL)

MHJCGC Software Solution Institute & Abid Ali Khan Educational Trust (The Siasat Daily) — June 2025 – August 2025
